

ECRAN high level workshop on INDCs

Republic of Serbia

Roundtable 2

Istanbul, Turkey, 28 April 2015

What to do before 2015?

What steps are taken, if external support is needed, what is it?

- Prepared:
 - Supported by IPA 2012 and GEF/UNDP projects
 - In cooperation with MME
- Based on sectoral strategies, official documents and data
- Presented:
 - Environmental Protection Committee/Parliament - April, 20
 - CCC will be
- Following process:
 - Governmental approval and submission to the UNFCCC - in next few months
- Implementation requires efforts, technical and financial support

What to do after 2015?

- What is necessary to be done to ensure implementation of the INDCs? Are current policies, strategies enough? Is there a thinking, planning regarding implementation of the INDCs on domestic level? What kind of support is needed from multilateral actors?
 - Political willingness
 - Combating climate change as a leading goal
 - Additional policies efforts – harmonization with the EU acquis during the process of EU accession
 - Reducing vulnerability – Serbia: droughts since 2000. over 5 billions EUR losses, floods in 2014. for reconstruction over 1,346.4 billions EUR
 - Technology transfer – infrastructural projects
 - Support for establishment and functioning of Green fund
 - Support for functioning of Energy efficiency fund
 - Exchange of knowledge and lessons learnt – e.g. ECRAN

Synergies between energy and climate policy

- Is there a thinking about renewed domestic energy strategy development taking into consideration decarbonisation? Planning and implementation of energy and climate policies for the long term – how do they correlate, how does energy policy take into consideration long-term decarbonisation goal (EU 2050 goal)
 - Climate strategy with its Action Plan
 - Program for the implementation of Energy Development Strategy

THANK YOU FOR ATTENTION
