

# First findings

- You did a lot already
- Steady improvement in reporting is visible
- Clear priority of areas of improvement setting over the years is needed
- National systems on a high level ( ministerial level)

# Common challenges

- Develop a national system component for LULUCF with the structure of all institutions needed.
- Plan a NFI (5-6 year process)
- To have outcomes for NFI in 2020 it should started now
- Land use change – is a very challenging issue for all
- The tracking of LU, LUC needed. The most probable you have some bases already in place used for different proposes. Investigate this resources.
- Soils ????

# Plan for tomorrow

- Work in 3 groups
  - Topics:
    - National system for LULUCF
    - Area system and Land Use Change
    - Soil of data and planing

Work with the excell sheets and assessing of data need
