

ECRAN - Serbia cooperation

Danijela Bozanic
Climate change unit
Ministry of agriculture and environmental protection

COP21, 5 December 2015

Importance of ECRAN

- Possibility to:
 - ✓ Learn about the EU acquis
 - ✓ Understand the EU acquis&national context (legal and institutional)
 - ✓ Identify national priorities
 - ✓ Evaluate pathways for achievement of goals
 - ✓ Improve cooperation&learn on experiences

Benefits from ECRAN

EU ETS

- Improved capacities for identification of needs and options – MRV
- ✓ IPA 2012: "Establishment of a MRV necessary for the effective implementation of the EU ETS,,
 - Institutional set up – endorsed by Government on 13 September 2014
 - Draft MRV Law – in a process of adoption
 - Sub-laws - final phase of preparation
 - List of installations – prepared
 - Extensive trainings for operators, CCD and SEPA - organized (January - June 2015)
 - ECRAN – additional trainings for industry

MMR and ESD

- Efficient system for combating climate change
- ✓ IPA 2013: “Establishment of mechanism for the implementation of MMR”
 - Establishment of institutional and procedural arrangements, legal framework and administrative and institutional capacities of the relevant bodies for implementation of MMR and ESD

Long-term planning

- INDCs and the Climate Change Strategy
- ✓ Modelling trainings
- ✓ IPA 2014: "Development of a Climate Change Strategy and its Action Plan,,

Additionally

- Involvement of different stakeholders - workshops in different parts of the country, cooperation with NGOs,
- ✓ National Climate Change Committee (NCCC)
- National High level event - June 11, 2015

THANK YOU FOR ATTENTION
