ECRAN Regional Training on assessment of GHG Inventories in Waste

24. November 2015,
 Sarajevo

Republic of KOSOVO

- ☐ Is not part of UN/UNFCCC
 - Is not active part of Montreal Protocol;
 - Is not active part of Vienna Convention
- ☐ Is not part of EU
- ☐ Has a low economic development and it is a part of developing countries
- ☐ Even Kosovo is not yet part of UN and EU we are working on transposition of EU directives in to our national legislation

Legal and institutional framework

- ❑ Law on Air Protection from Pollution No.03/L-160
- ❑ AI No.16/2013 for Substances that deplete the ozone layer and fluorinated greenhouse gases
- ❑ Air Quality Strategy 2013-2022
 - ✓ Planned Action Plan for Air Quality - 2015
- ❑ National Strategy for Climate Change
 - ✓ Action Plan for Climate Change in preparation
- ❑ AI on mechanism for monitoring greenhouse gas emissions in preparation
- ❑ AI for monitoring of greenhouse gas emissions in preparation

3

Legal and institutional framework

- ❑ AI No.16/2013 for Substances that deplete the ozone layer and fluorinated greenhouse gases approved by Government in 2013;
- ❑ AI on mechanism for monitoring greenhouse gas emissions and
- ❑ AI for monitoring of greenhouse gas emissions
 - These three administrative guidelines are in line with the acts of legislation of the European Union

4

Implementing legislation

☐Planned:

- Preparation of the plan for implementing AI on mechanism for monitoring greenhouse gas emissions
 - ✓ Organizing workshops with relevant institutions
 - ✓ Prepare low-carbon development strategies in accordance with any reporting provisions agreed internationally to contribute to:
 - the transparent and accurate monitoring of the actual and projected progress, including the contribution in fulfilling the commitments to limit or reduce anthropogenic greenhouse gas emissions;
 - meeting the greenhouse gas emission reduction commitments and achieving long-term emission reductions and enhancements of removals by sinks in all sectors.

5

Reporting

- ☐ Greenhouse Gas inventory is mandatory only for Annex-I Parties of the Kyoto Protocol.
- ☐ Kosovo is not part of Kyoto Protocol and is not obliged to report
- ☐ Greenhouse Gas are reported only within NIR (National Inventory Report). There are only generally information on the national level (e.g. Customs office collect information about F-gases import and export, but without specific information about gas identification and use)

6

Reporting requirements for GHG and air emissions

STATUS – Submission 2011–2014

Kosovo reports to the EEA priority data flow as a cooperating country ☺

International

- **National greenhouse gas (GHG) Inventory**
Submission under the United Nations Framework Convention on Climate Change (UNFCCC) and Kyoto Protocol
- **National air emission Inventory**
Submission under the UNECE Convention on Transboundary Air Pollution (UNECE/LRTAP)

Priority data flow indicator

AE2: UNFCCC data

Submission of data for 2008 & 2009

Europe

European Commission (EC)

AE1: CLRTAP data

Submission of data for 2008 & 2009

- **National Greenhouse Gas Inventory**
Submission under the EU GHG Monitoring Mechanism
Council Decision No 280/2004/EC concerning a mechanism for monitoring Community greenhouse gas emissions and for implementing the Kyoto Protocol
- UNFCCC and Kyoto Protocol
- **National Air Emission Inventory**
Submission under the NEC Directive
Directive 2001/81/EC of the European Parliament and of the Council of 23 October 2001 on national emission ceilings for certain atmospheric pollutants
- UNECE/CLRTAP

AE2a: EU GHG data

AE1b: NEC data

Submission uploaded on EIONET/CDR

7

criteria for scoring	Sub- mission	GHG						Air pollutants															
Data – NFR tables	15.02.																						
Informative Inventory report – IIR	15.03.																						
Data – NFR tables	31.12.																						
NEC report (not obligatory)																							
Data – CRF tables	15.04.																						
National Inventory report - NIR	15.04.																						
data – CRF tables	15.01.																						
National Inventory report – NIR	15.03.																						
		CO2	N2O	CH4	SF6	HFC	PFC	SOx	NOx	NM VOC	NH3	CO	Cd	Hg	Pb	HCH	PCP	HCB	DIOX	PAH	TSP	PM10	PM2.5
Industrial Processes		Greenhouse gas		F-gas		'NEC gas'							Heavy metals (HM)		Persistent organic pollutants (POP)					Particulate matter (PM)			
Energy																							
Manufacture and construction																							
Transport																							
International aviation and shipping																							
Land use, land-use change and forestry																							
Other																							

8

Strengths, weaknesses and needs

- ☐ Policy development and implementation
- ☐ Negotiations with UNFCCC, Montreal Protocol and Vienna Convention
- ☐ Enhancing planning and performance assessment capacities, at the national level for identification of the substance that deplete ozone layer and F-gases
- ☐ Lack of human capacities
- ☐ Financing

9

Thank you for your attention
