

Implementation of the WFD

ECRAN – Regional Workshop

Barriers, needs and challenges related to the WFD
implementation and suggestions in Bosnia and Herzegovina

Drina River Basin
(B&H)

Barriers

- Harmonization of legislation
- Lack of funding
- Synchronization of legislation with the WFD
- Compatibility of the Water Framework Directive and the Floods Directive
- Organic matters pollution of the surface water;
- Nutrients pollution of the surface waters;
- Hazardous substances pollution of the surface water;
- Hydro-morphological alterations of the surface water bodies;
- Quantitative and qualitative changes in groundwater;
- Low cost recovery.

Needs

- More coordination cooperated and efficient management at national and basin level
- Sustainable management
- Implementation of WFD
- Harmonization of WFD and FD
- Training of employees in the water sector
- Strengthening the vertical and horizontal cross-sectoral coordination
- The management of water demand;
- Qualitative and quantitative aspects of the management of river sediment transport;

Challenges

- Implementation of Nitrates Directive
- Pollution reduction
- Flood risk reduction
- Policy development for integration of Ecosystem
- Institutional development
- Economic instruments
- Construction of sewer systems, urban and industrial WWTPs;
- Strengthening of monitoring systems
- Protection of drinking water sources;
- Employment of new water tariffs and water fees policy;
- Improvement of the water quality (pollution) and quantity (abstractions) control;
- Hydro-morphologic pressures with an impact on the status of water.
- More active prevention on reducing the impacts of accidental pollution incidents

Thank You
