

Workshop “Program of Measure under the Water Framework Directive”

20 – 22 June 2016

ECRAN 62432

Results and the introduction of the workshop

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Structure of the presentation

- **WM WG tasks and results**
- **Workshop “Program of Measure under the Water Framework Directive”**
 - Objectives
 - Approaches
 - Expected outcomes

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Water Management Working Group

Activity 2.3: Water Management

- Task 2.3.1: Annual Meeting
- Task 2.3.2: Assistance in the development of transboundary river basin management plans
- Task 2.3.3: Economic analysis in accordance with the WFD (cost recovery and cost-effectiveness considerations), including innovative systems of waste water treatment
- Task 2.3.4: WFD and Marine Strategy Framework Directive – objectives, synergies and approaches

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.2: Assistance in the development of transboundary RBMPs

Scope: provision of practical assistance to the beneficiary countries in the development of the RBMP and the Program of Measures in Drina River Basin, selected as a pilot basin.

In recognition of the potential benefits through **replicability across the whole targeted ECRAN project beneficiaries**, a number of **Case Studies** from all beneficiary countries are discussed, and lessons learned to date, best practices and cross - cutting recommendations summarised.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Subtask 2.3.2.1: Assistance for the preparation of the Program of Measures (PoM) in Drina RB Approaches

- The development of RBMP specific topic will last all three years of the project 2014-2016.
- **A transboundary pilot river basin has been selected – Drina RB.**
 - a 4-phase methodology has been prepared for developing the PoM as part of the RBM Plan in Drina RB (phase 4 – 2016)
 - screening templates for a large number of topics
 - a Report is prepared including the Drina RBMP, the PoM and case studies from all beneficiaries (deadline end July 2016)
- **Engage all beneficiaries** in the discussions of the methodologies and templates
- Examine **issues for integration at different levels** (DRB, Sava, Drina) across policy domains (WFD, UWWTD, ND, FD, EQS, MSFD,...)
- Present **lessons learned** from MS experiences to exemplify specific items
- **Specific topics requiring assistance** to facilitate the production of the PoM were identified and presented for organising the training.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop on Eutrophication Reduction Measures under EU Water Directives

Main topics

- To examine the eutrophication and the designation of sensitive areas or nitrate vulnerable zone in line with the Nitrates Directive
- To discuss current eutrophication assessment methodologies and investigate implications for the RBM Plan and the Program of measures
- To analyse the synergies between the inland waters and transitional and coastal waters in relation to the nutrient reduction measures.
- To provide examples of the WFD-compliant assessment systems for coastal waters
- To present the assessment methodologies and criteria used for UWWT and ND designations
- To introduce the impact and pressure criteria used in WFD Article 5 risk assessment which can be applied by beneficiary countries
- To present the criteria and standards under the Marine Strategy Framework Directive with relevance for beneficiary countries

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop on Eutrophication Reduction Measures under EU Water Directives

Main topics(2)

Environment and Climate **ECRAN**

- To introduce the relevant EU policies, guidance documents and policies for the topics of the workshop
- To examine options to support decision makers from the local to the transboundary and international level on the challenges caused by reduction of eutrophication
- To discuss relevant needed coordination between WFD, ICZM and MSFD for the eutrophication at the national and regional level
- To discuss case studies from different countries describing (i) existing and proposed measures concerning control of marine and inland waters eutrophication, and (ii) measures intending for eutrophication management in the ECRAN beneficiary countries.
- Lessons learned from Romania

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Environment and Climate **ECRAN**
Regional Accession Network

Key points of discussion (1)

1. Eutrophication of lakes and problems with ensuring drinking water quality
2. Barcelona Convention and MAP
3. Different weight in regulating N compared with P
4. Agricultural practices: manure disposal, transport, financing
5. Problems related to monitoring, especially biological monitoring
6. Monitoring of priority substances
7. Criteria for selecting extension of sewage and not of individual system
8. Decision of municipalities for building their own wwtp supporting by their funds
9. Financing mechanism – increase of water price in case of regional operators
10. Regional operators owned by the municipalities

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Key points of discussion (2)

11. Use of money collected from penalties – who gets this money and how they are spent – RO – ANAR budget spent on monitoring
12. Differentiation and division between water supply and wastewater treatment
13. Monitoring obligations under different conventions and directives
14. Use of Inventories of emissions, E PRTR, EQS, ARS, contaminated sites
15. Requirements for creating sufficient admin capacity for negotiation at national level and local
16. Transposition obligation and deadlines
17. Accessing IPA funds
18. The size of EU infringements
19. Reorganization issue in line with WFD requirements
20. Technical capacity important during negotiations

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Outcomes

- Improved understanding of the topics, challenges and tasks, and related responsibilities along the eutrophication process, and the selection of the reduction measures in the RBMP in line with the WFD and in the Action Plan according to the MSFD
- Exchange of experiences and knowledge significantly improved
- Key obstacles impeding the tasks implementation and related solutions identified
- Active involvement of the participants through the preparation of case studies on eutrophication reduction measures
- Guidance documents related to the WG tasks discussed and clarified

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.3: Economic analysis in accordance with the WFD (cost recovery and cost-effectiveness)

Overall objective: provision of practical assistance to the beneficiary countries in the performance of the economic analysis in line with the WFD

Specific objectives:

- To carry out the economic analysis - Drina RB
- To develop case studies: CR, PES, CEA, CBA
- To discuss environmental costs and resource costs
- To discuss the economic of the climate changes adaptation measures with application to WFD and MSFD
- To prepare contributions to the Drina report using screening templates.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.3: Economic analysis in accordance with the WFD (cost recovery and cost-effectiveness)

Approaches:

- Methodology
- Screening templates
- Outline of the case studies
- Clarification of topics for case studies.
- Preparation of the case studies and inputs into the Drina Report.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.4: WFD and MSFD – objectives, synergies and approaches

Overall objective:

to strengthen national capacities for effectively addressing the large number of implementation challenges of the MSFD and the ICZM, analyzed in synergy with the process of reaching the WFD objectives.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.4: WFD and MSFD – objectives, synergies and approaches

Specific objectives:

- To present and discuss **synergy, overlaps and differences** between MSFD, WFD, ICZM and other EU relevant marine policies and directives
- To introduce and discuss policy, **institutional and organizational arrangements** for implementing MSDF
- To discuss the streamlined procedure for **development of PoM** under the MSFD and similarities with the development of PoM under the WFD, making use of the Drina PoM experiences
- To examine the role, approaches and **coordination needs for the MSFD implementation for landlocked countries**
- To explore any national **obstacles** (involvement and commitment, data and methodologies, coordination and cooperation, capacity building needs) and identify possible **solutions**
- To collect suggestions and reach agreement on the country – specific topic for further training (guidance, capacity building, practical case studies) for meeting the MSFD and WFD req.
- To present the reference and concept documents
- To facilitate dialogue among the countries on specific concepts and actions that are needed to ensure MSFD/WFD implementation.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Task 2.3.4 : Approaches

- Discuss the practical approach and the methodology for MSFD implementation
- Examine requirements of the Initial Assessment, the GES determination, development of PoM and performing Economic Analysis
- Organize surveys for all beneficiaries and review countries assessments and track progress
 - the coordination between WFD and MSFD
 - the MSFD Art 8 on Initial Assessment of the maritime waters
- Improve coherence and integration in land, water, coastal and marine management
- Share knowledge on management of land, water, coastal and marine linkages
- Engage all beneficiaries in the discussions of the methodologies for MSFD/ICZM
- Examine issues for integration at different levels (DRB, Sava, Drina) across policy domains (WFD, MSFD,...)
- Present lessons learned from MS experiences to exemplify specific items along the MSFD implementation and synergies with the WFD.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Topics discussed (1)

Regional Workshop on MSFD - Initial Assessment and Good Environmental Status:

- MSFD Initial assessment
- From Good Ecological Status (WFD) to Good Environmental Status (MSFD)
- Synergies between MSFD, WFD, other EU directives. Coordination between MSFD and other directives and policies
- WFD vs MSFD - Eutrophication still a significant issue for coastal and marine waters
- State of play of PoM in the frame of MSFD & WFD. National and transboundary context
- Key type measures related to MSFD & WFD Program of Measures
- Cost Benefit Analysis in the frame of CBA. Synergies/Differences MSFD and WFD
- Exemptions under MSFD and WFD
- Coordination of the MSFD at the regional level
- Financing issues in the frame of MSFD implementation
- Assessment of marine ecosystem services and link to the Good Environmental Status
- Implications of the GES targets and criteria

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Topics discussed (2)

- How to reflect marine related topics in the WFD transposed water legislation for maritime countries and landlocked countries
- Competent authority for implementing MSFD
- Responsibility of preparing the PoM under MSFD
- Funding sources to cover water the construction of sewages and wastewater treatment plants
- Responsibility for implementing the MSFD.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Topics discussed (3)

Regional Workshop “The economics of climate change adaptation measures under WFD, MSFD, ICZM ”

1) Climate change adaptation measures under WFD

- The most relevant policies, guidance, communications, technical papers, platforms and actions at the EU level dealing with economics of climate changes, WFD and MSFD
- Financial aspects, cost and shared benefits of considering adaptation measures in the RBMP
- Adaptation to the climate change in the RBMP for Danube River Basin (DRB)
- Assessing the economic importance of water uses in the context of climate change (WFD)

2) Climate changes adaptation measures under MSFD

- Coordination between WFD and MSFD for the climate change adaptation at the national and regional level
- Adaptation to climate change measures within the MSFD Action Plan
- Influence of climate change on Cost effectiveness analysis and Cost Benefit Analysis (WFD and MSFD) Risk reduction and climate change adaptation measures for coastal ecosystems
- Approaches and experiences on monitoring and evaluation of climate change adaptation measures
- Case studies on climate adaptation approaches and measures in the ECRAN maritime countries.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Topics discussed (4)

Regional Workshop “The economics of climate change adaptation measures under WFD, MSFD and ICZM ”

3) Economics of climate change

- ICZM used as a tool for adaptation to the climate change between WFD and MSFD
- Resource costs and climate change
- Case studies on cost of climate change mitigation measures and sources of funding
- Cross sectoral approach in the climate adaptation measures
- Presentation of the importance of adopting of a sectoral approach bringing together sectors such as agriculture, land use, water supply and sanitation, energy production
- Suggestions and recommendations for incorporation of climate change consideration in Drina RBMP.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Inputs from landlocked countries

The beneficiary countries, both maritime countries - **Albania, Bosnia & Herzegovina, Montenegro and Turkey**, but also the landlocked countries – **Kosovo, Macedonia and Republic of Serbia**, prepared their contributions to 2 questionnaires on:

- Coordination between WFD and MSFD
- MSFD Art 8 on Initial Assessment of the maritime waters.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop “Program of Measure under the Water Framework Directive”

❑ Overall objective:

The overall objectives of the workshop are to discuss the draft RBMP and its PoM for the Drina RB, together with all relevant legal and technical topics associated with the enforcement activities and steps to full compliance with the WFD in the beneficiaries.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop “Program of Measure under the Water Framework Directive”

❑ Specific objectives (1):

- To enhance the understanding of the contribution of all EU policies and directives to the WFD objectives.
- To summarise and review all legal and technical guidance documents, and all valuable references used for the development of the RBMPs and the PoM's in line with the WFD.
- To discuss chapters of the current draft RBM Plan for Drina RB.
- To discuss chapters of the current draft PoM for Drina RB.
- To discuss case studies prepared by all beneficiaries for the RBMP and PoM, including the Economic Analysis, in line with the WFD.
- To share all lessons learned useful for the development of the RBMP and the PoM

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop “Program of Measure under the Water Framework Directive”

❑ Specific objectives (2):

- To highlight the synergies between the WFD and all other EU Directives contributing to the WFD objectives.
- To examine options to support decision makers from the local to the trans-boundary and international level on the enforcement challenges.
- To review relevant needed coordination for the RBMP implementation at the national and regional level.
- Facilitate dialogue among the beneficiaries on specific topics that are needed to ensure WFD implementation.
- To brainstorm and discuss the activities needed for performing the remaining project tasks in line with WFD and to ensure the continuation of active involvement of all beneficiaries.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Workshop “Program of Measure under the Water Framework Directive”

Outcomes

- Improved understanding of the topics, challenges and tasks, and related responsibilities along the development of the RBMP in line with the WFD.
- Exchange of experience and knowledge significantly improved.
- Key obstacles impeding the tasks implementation and related solutions identified.
- Active involvement of the participants through the preparation of case studies
- Guidance documents related to the WG tasks discussed and clarified.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Topics to be discussed

- Preparation and delivery of the last Workshop -

“Actions toward the WFD good status - results, case studies and challenges”, Sarajevo, Bosnia & Herzegovina (11-13 July).

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Thank you!
