

# THE SEVESO DIRECTIVE

Ike van der Putte

This Project is funded by the European Union

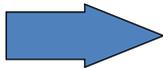

Source: RPS/EC, DG Environment/ECENA

Project implemented by Human Dynamics Consortium

## Seveso II Directive - Aim

- **prevention** of major accidents involving dangerous substances
- **limitation of the consequences** of accidents on man and the environment

**high level of protection**  
**for man and the environment**  
**throughout the European Union**

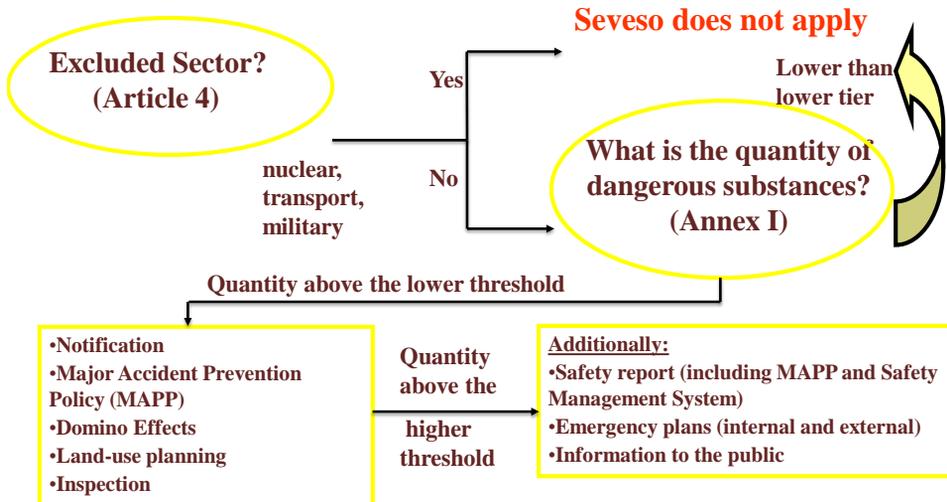

This Project is funded by the European Union

2  
Project implemented by Human Dynamics Consortium

## Seveso Directive – Scope & main obligations

This Project is funded by the European Union

3  
Project implemented by Human Dynamics Consortium

Environment and Climate  
Regional Accession Network **ECRAN**

## Seveso Directive – Scope, Methods

- ~ 4000 upper + ~ 4000 lower tier establishments storing dangerous substances -EU
- Mainly chemical and petrochemical industry, storage, big industrial production and energy installations
- Criteria: Hazard: Quantity of dangerous substances present
- .. the Seveso II Directive contains no detailed procedures and guidelines for risk assessment and management.
- A variety of such procedures is currently in use, employing different terminologies and underlying philosophies, making cross-comparison of results difficult.

This Project is funded by the European Union

4  
Project implemented by Human Dynamics Consortium

## *Seveso Directive – Control measures aimed at **Prevention***

### Upper and lower tier:

- General obligations
- Notification
- Major Accident Prevention Policy
- Domino Effects
- Inspection by Competent Authorities

### For upper tier only:

- Safety Report
- Safety Management System

This Project is funded by the European Union

5  
Project implemented by Human Dynamics Consortium

## *Seveso Directive – Control measures aimed at **limitation of the consequences***

### Upper and lower tier:

- General obligations
- Land-Use Planning
- Information to the Public

### For upper tier only:

- Emergency Planning
- More information to the Public on MAH

This Project is funded by the European Union

6  
Project implemented by Human Dynamics Consortium

## 2015 – Seveso III

Environment and Climate  
Regional Accession Network **ECRAN**

As a result of the review process, on 21 December 2010 the Commission adopted a proposal for a new Directive, replacing the current SEVESO II Directive by 1 June 2015.

- to align Annex I to the Directive to changes to the EU system of classification of dangerous substances (CLP)
- to include corrective mechanisms to adapt Annex I in the future
- to strengthen the provisions relating to public access to safety information, participation in decision-making and access to justice,
- to introduce stricter standards for inspections of installations to ensure the effective implementation and enforcement of safety rules.
- Stricter Landuse planning requirements

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Environment and Climate  
Regional Accession Network **ECRAN**

## CORRELATION WITH OTHER EU LEGISLATION

- CLP Directives
  - Definition of Hazardous Substances & Preparations
- REACH
  - Chemical Safety reports
  - New Studies on Chemicals – New Classification possible
- GHS
  - New Classification Rules – Downstream Effect
- Labour safety
  - Complementary to each other

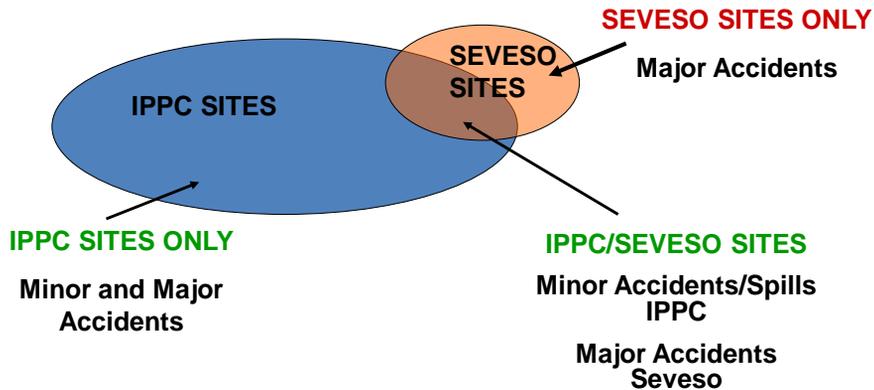

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## CORRELATION WITH OTHER EU LEGISLATION

### IPPC Directive - Different scope

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## CORRELATION WITH OTHER EU LEGISLATION

### IPPC Directive

#### •Synergies

- Use of management systems
- Use of less hazardous materials at the site
- Reduction in the volume of hazardous material stored at the site

#### •Differences

- Seveso** - protection of human health and environment from the negative effects of major accidents through prevention of major accidents using SMS
- IPPC** - protecting environment and human health on a long term basis by preventing and minimising pollution through use of BAT and EMS

#### •Potential Conflicts

- Safety over Environment ?
- Siting of establishments
- Technical measures

REACH/CLP → IPPC/SEVESO ?

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## SEVESO Examples Tier approach

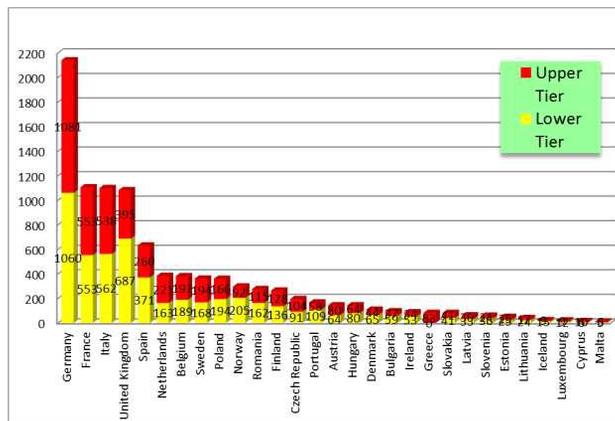

- Two Tier approach is used
- Maximum quantities of dangerous substances (existing or anticipated) are considered
- Compared against threshold quantities

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Environment and Climate **ECRAN**  
Regional Accession Network

## Two Tier Approach

- Consequences for Establishment:
- Quantities **below lower tier** have no obligations
- Quantities **above lower tier** must be reported to Local Authorities
- Quantities **above upper tier** have full obligations

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## → (What Are Full Obligations?)

- Establishment has to prepare:
- Safety Management System
- Safety report for the Establishment
- Internal Emergency Plan
- Local authorities update external emergency plan
- Involving the public

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## Threshold Quantities Environment and Climate Regional Accession Network **ECRAN**

- Given in SEVESO III Annex 1 for two categories of dangerous substances:
  - Generally Classified Substances (part 1)
  - Named Substances (part 2)

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## Generic Category of Substances (Part 1):

### SEVESO II

Toxic  
 Very Toxic  
 Oxidising  
 Explosive  
 Flammable  
 Highly Flammable  
 Extremely Flammable  
 Dangerous for the Environment  
 Other

### SEVESO III

**Health Hazards H** 1, 2, 3

**Physical Hazards, P**

- Explosives 1a, 1b
- Flammable gases, 2 cat 1 and 2
- Flammable aerosols, 3a, 3b
- Oxidising gases, 4
- Flammable liquids, 5b, 5c
- Selfreactive & mixt & peroxides, 6a, 6b
- Pyrophoric liquids, 7, cat
- Oxidising liquids and solids

**Environmental Hazards E**, E1, E2

Other

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## List of “Named” Substances (Part 2), e.g.

Bromine  
 Chlorine  
 Hydrogen  
 Methanol  
 Automotive Petrol and Other Petroleum  
 Spirits

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

# Named Substances

Environment and Climate  
Regional Accession Network **ECRAN**

- Examples from Annex 1, Part 2:

Dangerous Substances [CAS Number]	Lower Tier (t)	Upper Tier (t)
Ammonium Nitrate [6484-52-2]	350	2500
Chlorine [7782-50-5]	10	25
Hydrogen [1333-74-0]	5	50
Liquefied High Flammable Gases (Incl. LPG) and Methane	50	200
Polychlorodibenzofurans and Polychlorodibenzodioxins		0.001

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Environment and Climate  
Regional Accession Network **ECRAN**

## Generic Classification is based on:

### In SEVESO II

- Classification, Packaging and Labelling of Dangerous Substances and Preparations (67/548/EEC)
- Use LD<sub>50</sub> or LC<sub>50</sub> values if available, e.g. very toxic if LD<sub>50</sub> orally in rats is <25 mg/kg
- Use 'R' phrases if available, e.g. risk phrase R11 indicates a highly flammable liquid

In December 2008 the European Parliament and the Council adopted a new Regulation on classification, labeling and packaging of substances and mixtures (CLP - Regulation (EC) No 1272/2008) to align existing EU legislation with the GHS.

In SEVESO III (2015) adaptations were required in classifications (Annex I)

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

# Generally Classified Substances

Environment and Climate  
Regional Accession Network **ECRAN**

- Examples from SEVESO III Annex 1, Part 1:

Group of Dangerous Substances		Lower Tier (t)	Upper Tier (t)
1.	<b>VERY TOXIC</b> <b>(SEVESO III – H1)</b>	5	20
2.	<b>TOXIC</b> <b>(SEVESO III – H2, H3)</b>	50	200
3.	<b>OXIDIZING</b> <b>(SEVESO III – P8)</b>	50	200

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

Environment and Climate  
Regional Accession Network **ECRAN**

## Rule On Addition

- Formula: **Triggering criteria regarding Lower or Upper Tier**
- $$\sum_i \frac{q_i}{Q} > 1$$

$q_i$  - the quantity of dangerous substances  $i$

$Q$  - the relevant threshold quantity to be applied for all dangerous substances

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## Rules In Annex 1

- Mixtures and Preparations → as Pure Substances (Properties)
- Ignore  $q_i/Q < 0.02$
- Add separately  $q_i/Q$  for Toxic (H= health hazards), Flammable/Explosive/Oxidising (P = Physical Hazards) and Environmental Hazardous Substances (E = Environmental Hazards)
- In the case of dangerous substances with properties giving rise to more than one classification, the lowest qualifying quantities shall apply.

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## Example 1

•Name	•Amount •(q)	•Low •Tier (Q)		•Upper Tier •(Q)	
	•tons	•tons	•q/Q	•tons	•q/Q
• Hydrogen	•10	•5		•50	
• Propane	•20	•50		•200	
• Methanol	•50	•500		•5000	
• Sum:	•80	•-	> 1?	•-	> 1?

Lower Tier !

Upper Tier !

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium

## EXAMPLE 2

	Chemical	Classification	Quantity On Site (tonne)	Thresholds (tonne) Lower Tier	Thresholds (tonne) Upper Tier
A	Ethylene Oxide	Named substance, Toxic and Extremely Flammable	3	5	50
B	Methanol	Named substance, Toxic and Highly Flammable	400	500	5000
C	Misc. Flammable Liquids	Flammable	3500	5000	50000
D	LPG	Named Substance, Extremely Flammable	10	50	200
E	Misc. Substances	Extremely Flammable	1	10	50
F	Misc. Toxic Substance	Toxic	5	50	200
G	Aqueous Waste Stream	R50, Dangerous for the Environment (E2)	15	200	500
H	Di-tert-butyl peroxide	Highly Flammable and Oxidising	20	5000 and 50	50000 and 200

This Project is funded by the European Union

29  
Project implemented by Human Dynamics Consortium

### Typical Oil Terminal

#### Storage capacity:

- Kerosine 2000 tonnes (flammable)
- Petrol 3500 tonnes (named substance)
- Diesel 1600 tonnes (not classified)
- Heavy Fuel Oil - 5000 tonnes (not classified)

This is a Seveso lower tier site

This Project is funded by the European Union

30  
Project implemented by Human Dynamics Consortium

## Typical Pharmaceutical/ Chemical Company

### Storage Capacity

Flammable chemicals - 20000 tonne

Benzene - 100 tonnes (toxic)

Acetonitrile - 150 tonnes (toxic and flammable)

Hydrochloric acid - 100 tonnes (not classified)

Sodium hydroxide - 150 tonnes (not classified)

This is a Seveso top tier site

This Project is funded by the European Union

Project implemented by Human Dynamics Consortium
