

Practical exercise – F-gas workshop

- Task:
 - Prepare a roadmap for the implementation of F-gas regulation in an imaginary country envisioned in the general conditions of ECRAN beneficiaries participating at the training step by step in groups
 - Introduce the approach and detailed steps you recommend for each steps to the other participants, including likely challenges

Practical exercise – F-gas workshop

- F-gases Regulation main purposes:
 - **Improve the prevention of leaks** from equipment containing F-gases
 - **Avoid F-gases in some applications** where environmentally superior alternatives are cost-effective

Practical exercise – F-gas workshop

- F-gases Regulation wrap-up requirements:
 - Standard **Leak Checking Requirements** for stationary refrigeration, AC, heat pumps, and stationary fire protection equipment containing F-gases
 - **Labelling requirements** for products and equipment with certain F-gases
 - Format for the **report** by producers, improters and exporters

Practical exercise – F-gas workshop

- F-gases Regulation wrap-up requirements:
 - **Certification** of companies and technical staff (and mutual recognition of MS certificates) for handling applications
 - **Certification** of companies and techhnical staff recovering certain F-gases from equipment
 - Minimum requirements for **training programmes**
 - **Format** for notification of the training and certification programmes

Steps for the exercise

Identify important elements for the roadmap

What tasks/steps are required for transposition and implementation of the F gases Regulations, including:

- Planning and preparation
- Training and capacity building and awareness requirements
- Addressing compliance with the regulations
- Reporting requirements according to the F gases Regulation

Steps for the exercise

- Four groups: (1) Albania (2) MK (3) BiH, MN (4) Kos
- Each group will nominate rapporteur
- 45 minutes brainstorming
- Make a presentation of maximum 8 slides
- Presentation of each group maximum 10 minutes
