TAIEX-ECRAN Sub-Regional Workshop on Appropriate Assessment on Turkish Pilot Site (Natura 2000)

Workshop I: Screening – stage I of the Appropriate Assessment

Topic: “Geographical scoping” of AA

Ankara, Republic of Turkey, 12 – 14 November 2014

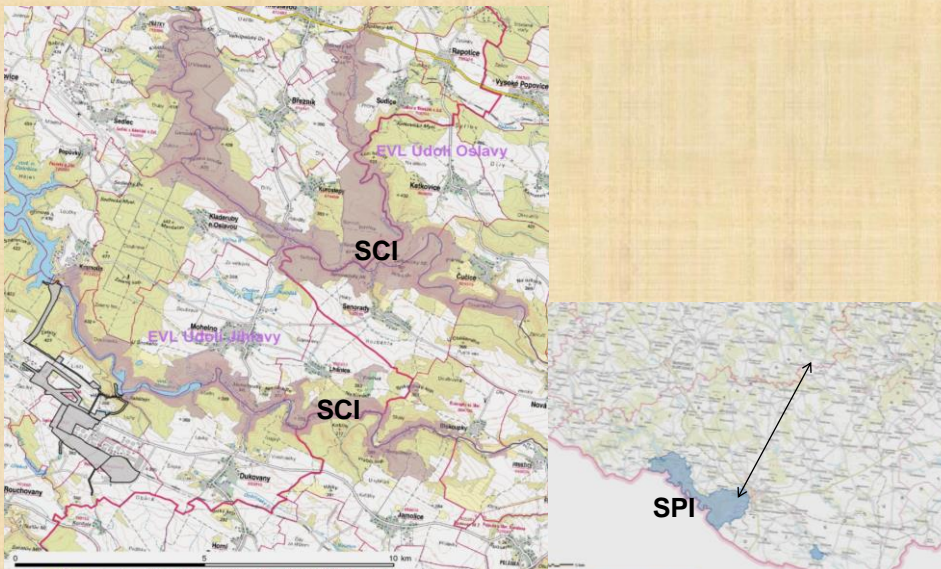

This Project is funded by the European Union

A project implemented by Human Dynamics Consortium

Location of the assessed project in relation to Natura 2000 sites

Environment and Climate
Regional Accession Network

ECRAN

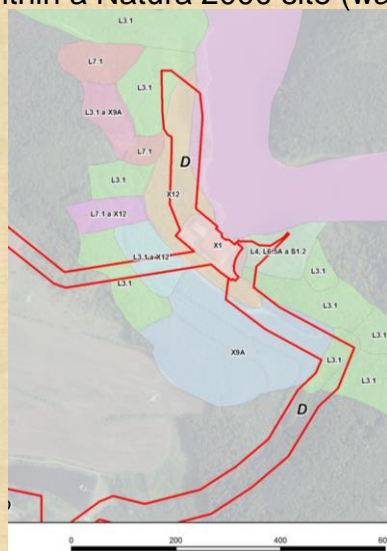

Location of the assessed project in relation to Natura 2000 sites (water management of the power plant)

Environment and Climate
Regional Accession Network

ECRAN

Location of the assessed project in relation to target features within a Natura 2000 site (water management of the power plant)

Environment and Climate
Regional Accession Network

ECRAN

Who mostly presents geographical location, objective/purpose and design of the project

- developer (investor)
- real estate agent delegated by developer
- architect preparing the project

Enviroment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

Key questions:

- Is the project inside or outside a N2K site?
- Has the project any linked activities? Which and where?
- How is the infrastructure of the project designed?
- How is logistics organized relating to project preparation and operation?
- Are there any other projects, not linked to the assessed project but likely to affect the same site(s)?

Enviroment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

Is the project location inside or outside the N2K site?

Is this a crucial issue?

„Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives“

Hab. Dir. Art. 6.3

Result: No, project location in relation to the site is not an issue!

Environment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

„Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives“

Hab. Dir. Art. 6.3

Project with significant effect could be situated tens or hundreds of kilometers far away from the site!

Project with significant effect could be situated abroad as well! (Transboundary assessment is necessary!!!)

Environment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

Has the project any linked activities? Where? Which ones?

„Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives“

Hab. Dir. 6.3

Key question: Could the displayed project exist independently without any other activities?

(risk of „salami slice method“!)

Environment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

Has the project any linked activities? Where? Which ones?

Project can't exist without other activities and sources:

Water in lake and influence of water pumping on the river downstream the reservoirs

Water quality (physical as well as chemical after use)

All these parts of the project should be assessed!

Environment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

How is the infrastructure of the project designed? Where?

Most of the projects have corresponding consequences, infrastructure and logistic!

Building material transportation

Maintenance of the plant in future

Dismantling after its lifespan

Enviroment and Climate
Regional Accession Network

ECRAN

Location of the assessed project

Are there any other projects not linked to the assessed project? Where?

„Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives“

Hab. Dir. 6.3

It is necessary to search for any other activity which could be interacting with the assessed project
